

2ND ANNOUNCEMENT

2015 have just started, the ICO is coming and the inscriptions have already begun. Last November we visited those places that we will be going during the mid and post-congress tours to ensure odonates were raising the next generation... and they are doing a good job!

The Organizing Committee is working on the preliminary program of the ICO 2015. There are Plenary Talks confirmed, and several Sessions have already been proposed.

We invite you to submit your Sessions' proposals. We are looking forward to receiving your contributions. Please send your works through the ICO 2015 web page (<http://ico2015-argentina.com.ar/>) or e-mail (icoargentina2015@gmail.com).

Aerolíneas Argentinas (<http://aerolineas.com.ar/>) is the official transportation of the ICO-2015! This means that you can have discounts on national and international flights. Ask for the discount code via e-mail (icoargentina2015@gmail.com)

Members of the WDA can **now pay the inscription via PayPal** through the WDA webpage (<http://worlddragonfly.org/>). Please remember to attach the invoice together with the inscription form.

Next March we will be announcing deadlines for communications, the schedule for the post-congress tour and hotel's discounts in La Plata.

PLENARY TALKS

▪ **FRANK SUHLING:**

Dragonfly distribution in times of global warming: presumptions, patterns, processes

▪ **MICHAEL J. MAY:**

New perspectives on some aspects of phylogeny in the Anisoptera

▪ **ADOLFO CORDERO RIVERA:**

Insights into etho-diversity: a study of two mirabilis, Hemiphlebia and Pseudolestes

▪ **MICHAEL L. SAMWAYS:**

Conservation of narrow range endemics: what are the ingredients of success?

▪ **KLAAS-DOUWE DIJKSTRA:**

Flying colours: will dragonflies be the first insect order to break the 'vertebrate barrier'?

▪ **ENRIQUE GONZALEZ SORIANO & RODOLFO NOVELO GUTIERREZ:**

Development in the study of Mexican odonatology. From larval to adult stage.

▪ **JOACHIM HOFFMANN:**

The ecoregions of the Neotropics and their dragonfly fauna, as an example Peru.

▪ **GÖRAN SAHLEN:**

Dragonfly biodiversity in Swedish forest lakes: current interpretations of patterns observed

SESSIONS

▪ Macroecological studies and species distribution models using dragonflies.

CHAIR JOHN P. SIMAIKA

▪ Frontiers in Corduliidae s.l. research: an overview of emeralds, cruisers and tigertails.

CHAIR ÂNGELO P. PINTO

▪ Larvae, the other stage.

CHAIR RICHARD ROWE

▪ Genomics.

CHAIR MARÍA OLALLA LORENZO-CARBALLA

▪ Asian biodiversity.

CHAIR TZE-WAI TAM

▪ Neotropical Odonata.

CHAIR JOACHIM HOFFMANN
